EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Edmondson on 6/21/2005.

The application has been amended as follows:

Claim 1, line 13: the phrase "control unit for adjusting" is changed to --control unit for variably adjusting--.

Allowable Subject Matter

Claims 1-8, 10-13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose a "variably adjusting" control unit in combination with the other elements. Regarding claim 2: the prior art does not disclose a plurality of plates of an airfoil cross section provided at the intake port section for adjusting an amount of air flowing therein, and a plurality of support members provided at both ends of the plates for rotatably supporting the plate.

- Walmsley (2003/0098388): is silent with respect to what purpose the turbine serves and does not teach connecting the turbine to the propeller, does not have air intake ports, the only port is annularly disposed on top of the air frame, not on the side, there are no ducts, and only an opening and does not have a controller for variably adjusting the shutters.
- A. C. Roberson et al (2,953,321): only has one "port", and is not below the frame 10. Actually the port is above the gram.
- W. M. Willis: (3,365,149) does not have a plurality of intake port. Instead has annular intake portion. Does not have shutters to regulate air flowing into the intake ports.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen A. Holzen whose telephone number is 571-272-6309. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harvey Behrend can be reached on 202-636-3646. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
